

CHIKE JARRET ANDY-IWEBELUA

Frontend Developer | IT & Digital Technology Professional

United Kingdom | 07554 199319 | andyiwebelujarret@gmail.com | [GitHub](#) | [LinkedIn](#)

PROFILE

Frontend Developer with hands-on experience building responsive web applications using **JavaScript, React, HTML5, CSS3, REST APIs, and Vite**. Completed structured software development training through HyperionDev and Learning People, with practical experience developing interactive interfaces, integrating APIs, implementing CRUD functionality, debugging applications, and using Git/GitHub for version control.

Brings **6+ years of combined IT, systems, project support, and digital technology experience**, including work in Agile environments, technology-enabled project delivery, stakeholder coordination, technical support, user training, and digital service transition. MSc-qualified in Information Technology for Energy Industries, combining software development skills with established professional experience in technology environments.

Seeking **Junior Frontend Developer, Frontend Developer, Web Developer, or Software Developer** opportunities.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript, React, React Hooks, Vite, Bootstrap, jQuery, Responsive Web Design

Development: REST APIs, Axios, JSON, DOM Manipulation, CRUD, LocalStorage, Component-Based Development

Backend: Node.js, Express, Python

Databases: SQL, PostgreSQL, MongoDB

Testing: Jest, React Testing Library

Tools: Git, GitHub, Postman, Jira, Microsoft Teams, SharePoint

SOFTWARE DEVELOPMENT TRAINING

LEARNING PEOPLE | UK / Remote | Full-Stack Development Programme | Aug 2025 – Sep 2026

- Completed the frontend development component of a structured full-stack development programme.
- Developed practical skills in HTML, CSS, JavaScript, responsive web development, application logic, and modern frontend practices.
- Built interactive web interfaces and worked with APIs and external data sources.
- Applied development practices including debugging, testing, version control, code organisation, and problem-solving.
- Gained exposure to the broader full-stack development lifecycle while specialising in the frontend component.

HYPERIONDEV | London / Remote | Software Development Fellow | Dec 2024 – Mar 2025

- Completed intensive project-based software development training using HTML, CSS, JavaScript, React, Node.js, Express, and MongoDB.
- Built multiple web applications implementing responsive design, REST API integration, CRUD functionality, component-based development, and application logic.
- Used Git and GitHub for version control and project management.
- Applied debugging and testing practices throughout development projects.

SELECTED PROJECTS

Weather Application | React | Vite | JavaScript | CSS | REST API

- Built a responsive weather application providing live weather information for cities worldwide.
- Integrated the OpenWeatherMap API and implemented asynchronous data retrieval and dynamic rendering.
- Developed a responsive interface designed for different screen sizes.

Nationality Analyzer | React | Vite | JavaScript | CSS | REST API

- Built a React application integrating the Nationalize.io API to return predicted nationality probabilities from a user's first name.
- Implemented API requests, data handling, dynamic rendering, reusable components, and responsive styling.

Task Manager | HTML | CSS | JavaScript | LocalStorage

- Developed a task management application supporting full CRUD functionality.
- Implemented task creation, editing, completion, and deletion using JavaScript.
- Used LocalStorage to persist task data between sessions.

Simple Calculator | HTML | CSS | JavaScript

- Built a responsive calculator demonstrating JavaScript logic, DOM manipulation, event handling, and dynamic interface updates.

PROFESSIONAL EXPERIENCE

FIRMLINK INTERNATIONAL LTD | Aberdeen, UK | Project Analyst | Oct 2023 – Present

- Support technology-enabled projects within Agile environments, coordinating activities across stakeholders and supporting delivery against agreed objectives.
- Support the delivery of web-based learning solutions and digital content.
- Manage project workflows, documentation, and communication using Jira, Microsoft Teams, and SharePoint.
- Work with stakeholders to understand requirements, track activities, and resolve delivery issues.
- Support the adoption of digital tools and technology-enabled processes.

SWORD IT SOLUTIONS | Aberdeen, UK | IT Analyst | Mar 2023 – Sep 2023

- Supported the implementation and adoption of Microsoft 365 solutions across an enterprise environment.
- Developed onboarding materials and delivered user training to support technology adoption.
- Provided technical support, troubleshooting, and guidance to users across digital services.
- Supported digital service transition activities, documentation, stakeholder communication, and issue resolution.

ITWORX | Aberdeen, UK | IT / Systems Support | Dec 2021 – Dec 2022

- Provided onsite technical support, troubleshooting hardware, software, connectivity, and systems issues.
- Supported infrastructure improvements and reliable delivery of IT services.
- Delivered technical training and user guidance.
- Maintained IT asset management processes and equipment records.

TRANSMISSION COMPANY OF NIGERIA | Abuja, Nigeria | Technical Support, Project Management Unit | Sep 2019 – Oct 2021

- Provided technical support to the Project Management Unit within a critical operational environment.
- Supported ERP and SCADA systems, troubleshooting technical issues and helping maintain system availability.
- Assisted with telecommunications equipment installation, maintenance, and troubleshooting.
- Maintained hardware inventory and supported the resolution of technical issues for project teams.

EDUCATION

Robert Gordon University | Aberdeen, UK | MSc Information Technology for Energy Industries | 2023

Madonna University | Nigeria | BSc Electrical and Electronics Engineering | 2018
